Notes

- Reported by the user's own MetaTrader terminal through a read-only AT24 Expert Advisor and stored in an append-only hash chain. It is NOT independently verified by the broker or by AT24.
- Closed trades only. Open positions are shown with a delay and without prices. Times are the broker's server time.
- No start date can be chosen: every figure runs from the first reported event. Trades before the first sync were reported by the terminal at that moment.
- Past results do not predict future results. This is not investment advice or an offer to manage money.
